

Dazzle Dry

What is Dazzle Dry?

Unlike ordinary lacquers, Dazzle Dry is specially formulated by Dr. Vivian Valenty to expand and contract with the natural nail. The signature four-step system works together to deliver high-performance wear and protection, allowing nails to become healthier and stronger over time.

Benefits of Using Dazzle Dry

LONG-LASTING

When used as a system, Dazzle Dry delivers chip-free wear for up to two weeks. It has the long-lasting performance of a gel or dip system but removes with the ease of a traditional polish.

QUICK-DRYING

Dazzle Dry is the only natural nail care system to offer hard-set nails in just five minutes without exposure to hazardous UV lamps.

NON-TOXIC AND NON-YELLOWING

Dazzle Dry is free from harmful chemicals and skin-sensitizing ingredients such as toluene, formaldehyde, TPHP, nitrocellulose, camphor, formaldehyde resin, ethyl tosylamide, phthalates, xylene, and MEK.

HUMANE

Dazzle Dry products are never tested on animals. They are free of animal byproducts and formulated with vegan alternatives for carmine, guanine, urea, stearic acid, lanolin, glycerin, collagen and beeswax.
